Education

Carnegie Mellon University *Expected May 2031*
Doctor of Philosophy in Electrical and Computer Engineering Pittsburgh, PA
• Advisor: Olivia Hsu

Cornell University *May 2024*
Master of Engineering in Computer Science Ithaca, NY
• Advisor: Adrian Sampson

Cornell University *December 2023*
Bachelor of Science in Computer Science, Electrical and Computer Engineering Ithaca, NY

Research Experience

• **Carnegie Mellon University** *May 2026 – Present*
Graduate Student Researcher Pittsburgh, PA

• **Unaffiliated** *December 2025 – May 2026*
Independent Researcher Mountain View, CA
◦ Developing an interactive synthesis system to schedule a compiler from PyTorch to sparse accelerators [2]

• **Cornell Computer Systems Lab** *January 2022 – May 2024*
Undergraduate Researcher, Capra Research Group Ithaca, NY
◦ Designed compiler from PyTorch to FPGA-executable Verilog with parallel banking optimizations [3] [4]
◦ Implemented accelerated pangenomic graph queries using Dahlia, a hardware generation language

• **Purdue Duality Lab** *September 2020 – May 2021*
Undergraduate Researcher West Lafayette, IN
◦ Analyzed domain-specific regular expressions for DFA complexity, portability, and back references
◦ Implemented ranking scheme to cluster groups of regexes using metrics such as F-Score and mistake rate

Publications

Refereed Workshop Papers

[1] **Evan Williams**, Justin Lubin, Rubens Lacouture, and Olivia Hsu. *Interactive Design Space Exploration for Sparse Accelerators*. Young Architect Workshop (YArch) co-located with ISCA. 2026.

[2] **Evan Williams**, Justin Lubin, Rubens Lacouture, and Olivia Hsu. *Interactive Compiler Scheduling with Strong Guarantees*. Workshop on Languages, Tools, and Techniques for Accelerator Design (LATTE) co-located with ASPLOS. 2026.

[3] Jiahan Xie, **Evan Williams**, and Adrian Sampson. *From PyTorch to Cayx: An Open-Source Compiler Toolchain for ML Accelerators*. Workshop on Compilers for Machine Learning (C4ML) co-located with CGO. 2026.

[4] Jiahan Xie, **Evan Williams**, and Adrian Sampson. *From PyTorch to Cayx: An Open-Source Compiler Toolchain for ML Accelerators*. Workshop on Accelerated Machine Learning (AccML) co-located with HiPEAC. 2026.

Under Review and In Progress

[5] **Evan Williams**, Justin Lubin, Rubens Lacouture, Sarah Chasins, and Olivia Hsu. *Scheduling by Navigation with Fine-Grained Composition*. In Progress. 2026.

Teaching Experience

- **18-740: Modern Computer Architecture and Design** — *Fall 2026*
  Graduate Teaching Intern — Carnegie Mellon University
- **CS 3410: Computer System Organization and Programming** — *Summer 2024*
  Course Developer — Cornell University
- **CS 3110: Data Structures and Functional programming** — *Spring 2022, Spring 2024*
  Teaching Assistant — Cornell University
- **ECE 4750/CS 4420: Computer Architecture** — *Fall 2023*
  Teaching Assistant — Cornell University
- **ECE 5755: Modern Computer Systems and Architecture** — *Summer 2023*
  Course Developer — Cornell Tech
- **CS 4820: Intro to Analysis of Algorithms** — *Fall 2022, Spring 2023*
  Teaching Assistant — Cornell University
- **CS 159: C Programming** — *Spring 2021*
  Teaching Assistant — Purdue University

Mentoring

- **Malena Cochrane** — *May 2026 – Present*
  Carnegie Mellon University B.S. expected 2028
  - Malena is currently investigating techniques for selecting optimal mappings from sparse kernels to hardware backends in the Mosaic compiler via profile-guided optimizations and cost models

Honors and Awards

- **Computer and Information Science and Engineering Graduate Fellowship (CSGrad4US)** — *2025*
  National Science Foundation (NSF)
- **Cum Laude** — *2023*
  Cornell University
- **Dean's List** — *2021, 2022, 2023*
  Cornell University
- **Outstanding Undergraduate Course Staff** — *2022, 2023, 2024*
  Cornell University College of Computing and Information Science (CIS)
- **Victor H. and Helen T. Green ECE Scholarship** — *2021*
  Purdue University School of Electrical and Computer Engineering (ECE)

Work Experience

- **Amazon Web Services** — *August 2024 – April 2026*
  Software Development Engineer, Amazon HealthOmics — Mountain View, CA
  - Led effort to support CUDA driver integration and implemented type coercion to enable new customer workloads
  - Parallelized integration test execution to reduce time for production deployments in CI/CD pipeline by 50%
- **Amazon Web Services** — *May 2023 – August 2023*
  Software Development Engineer Intern, AWS IoT RoboRunner — Sunnyvale, CA
  - Developed application to perform deep packet inspection on MQTT network traffic using C++ and Docker
  - Integrated with Amazon CloudWatch and AWS DeviceDefender to alert customers of anomalous behavior
- **Deloitte Consulting** — *June 2022 – August 2022*
  Solutions Engineer Intern — New York, NY
  - Conducted research and drafted design documentation for mobile application to assist crews in electrical outages
  - Composed Python scripts to automate SQL database queries and connected to live front-end using a REST API
- **Commonwealth Associates** — *May 2021 – August 2021*
  Electrical Engineering Intern — Jackson, MI
  - Designed alarm modules and relay circuits for electrical substations to improve power and energy efficiency
  - Created mobile application for internal employees to express feedback and ideas to upper-level management

Talks

- **Compiler Infrastructures for ML Accelerator Design**
  Google DeepMind — April 2026
- **Frontend Accelerators for Pangenomic Graph Queries**
  NSF PPoS Panorama Meeting for Computational Genomics — May 2022

Service

- CMU PhD ECE Student Organization (PESO) Member — *August 2026 – Present*
- ASPLOS 2027 Artifact Evaluation Committee
- PACT 2026 Artifact Evaluation Committee
